

## Mathematics, Physics and Chemistry

The course was started in the year 1989 with an objective to provide the best knowledge in basic sciences.

### Mathematics:

Mathematics is a methodical application of matter. Mathematics makes our life orderly and prevents chaos. Certain qualities that are mathematics are power of reasoning, creativity, abstract or spatial thinking, critical thinking, problem-solving ability and even effective communication skills.

## Physics:

The department offers one of the basic Sciences Physics. The department has a team of highly experienced and motivated faculty members who are in process of tuning the young minds to make them globally and “Physic”ally competitive. ” The scope of physics is the hope of the science”. In the department we not only give emphasis on studies but also apply our knowledge in understanding what physics is, and how it’s applied. Our students gain vital communication and critical-thinking skills, through innovative teaching-learning process. Our department provides a platform for the students to enhance their employability skills through Industry Institute Collaboration.”

## Chemistry:

The Department of Chemistry is committed to providing an open, safe, and engaging environment in which all persons are welcome and respected. We strive hard to cultivate a fair environment where our students can thrive as they advance new chemical frontiers through research, innovation, collaboration and scholarship. They can achieve placements in pharmaceutical companies as production administrators and quality control analysts. They can serve medical representatives as well to mediate between doctors and medical market.
