About Biohub

Biohub is a bio club established by the students of the department of MB.BT.BC. It was initiated by the students of 2012-2015 batch and was inaugurated on August 31, 2015. Biohub is regarded as a stage laid for showing the inner perspective of biological science students. We define science that is not seen in the textbooks and that is not confined or restricted within the inner walls of the teaching but it is seen beyond the margins of definition of science.
